

**CR515 Town Center Project  
Phase II Construction**

**CHANGE OF TRAFFIC PATTERN**

Effective November 7<sup>th</sup>, new traffic patterns will be in effect in the Vernon Town Center for the Route 515 work zone from the A&P Shopping Center Area to Route 94. Northbound traffic will stay on Route 515 through the work zone. Southbound Route 515 traffic will be directed onto Main Street at the intersection with Route 94/Church Street and then continue along Main Street to the intersection with Route 515. By turning right onto Route 515 at the traffic signal you can continue southbound (uphill) toward Route 23. Access to the businesses on the east side of Route 515, from Main Street to Route 94, can be attained by turning left at the Route 515/Main Street signal. By driving straight through the intersection at the signal you will access the Shopping Center.

There will be signs in place to direct Route 515 southbound traffic from Route 94, in either direction, onto Main Street as well as for Church Street traffic. Access to businesses along the west side of CR515 will be from Main Street, Guthrie Drive, or northbound CR515.

This traffic pattern will be in effect for the next 6 – 8 weeks, weather permitting.

**Questions pertaining to this project/detour can be directed to the Division of Engineering at 973-579-0430 or [dpw@sussex.nj.us](mailto:dpw@sussex.nj.us).**
