

SUSSEX COUNTY GREEN INFRASTRUCTURE SEMINAR

You are invited to a free green infrastructure seminar sponsored by Sussex County in partnership with the RCE Water Resources Program at Rutgers University.

What is Green Infrastructure?

Green infrastructure is an approach to wet weather management that is cost-effective, sustainable, and environmentally friendly. Green Infrastructure management approaches and technologies capture and reuse stormwater to maintain or restore natural hydrology.

Why Should I Attend?

This seminar will focus on new and emerging technologies and programs that can be integrated into the way we conduct business in New Jersey to lessen the impact our commerce has on the environment. Details and discussions will include information and resources involving “green” or “environmentally-friendly” purchasing practices, marketing, building and renovations, along with facility maintenance and new development. The goal of the seminar will be to disseminate resource information to attendees for further investigation and adaptation into current business practices.

Seminar

Green Infrastructure: Green Alternatives and Opportunities for Business & Industry

Date: Wednesday, March 30, 2011
Time: 1:00-3:00PM
Location: Sussex County Administrative Center
3rd Floor, Room 3A-B
One Spring Street
Newton, NJ 07860

Where do I register?

Please go to www.water.rutgers.edu to register for this seminar. Hurry. Space is limited!

Who is the Presenter?

The Seminar features Dr. Kevin Lyons from Rutgers, The State University of New Jersey. Kevin Lyons, Ph.D., is the Chief Procurement Officer/Executive Director of Procurement and Contracting. He manages the University's Green Purchasing Program and is a Research Professor in Supply Chain Environmental Archeology.
